City notified of diesel leak near water treatment plant; precautions have been taken

Kerrville, Texas (May 13, 2023) – The City of Kerrville has been notified by the Kerrville Fire Department of a diesel leak from a business upstream of our water treatment plant. The leak resulted from damage during Friday night's storm.

The city has taken appropriate precautions and has switched from surface water to our groundwater wells.

The Texas Commission on Environmental Quality (TCEQ) has been notified and is working with the business owner to mitigate the situation.

The city will remain on our groundwater wells as we continue to monitor the situation, with the water plant coming back online sometime next week.
