### **City moving to Stage 3 Water Conservation Measures**

**Kerrville, Texas (Nov. 14, 2023)** – Due to severe drought conditions, the City of Kerrville declared a water emergency in late August and moved from Stage 2 to Stage 4 Water Conservation measures. Since that time, rainfall has allowed Nimitz Lake to fill significantly, the Guadalupe River is now flowing through Kerr County, well levels have come back slightly, and one of the largest wells in the city, Meadowview, has been repaired.

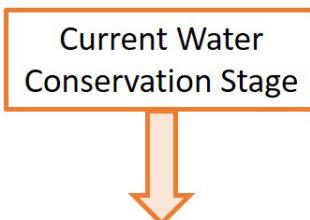

In response to these recent developments, the city will move to Stage 3 Water Conservation Measures effective at 12:01 a.m. on Wednesday, Nov. 15, 2023.

The city is continuing to work on several other wells, but with the work progressing rapidly and misty, cool weather in the forecast, the city hopes to reduce the water conservation measures further in the upcoming weeks.

Stage 3 Water Conservation measures allow for lawn watering with sprinklers from 6-9 a.m. Tuesday and Saturday for odd addresses and Wednesday and Sunday for even number addresses.

For more information, please visit the City of Kerrville website at <https://www.kerrvilletx.gov/> or call (830) 257-8000 for general water or Stage 4 questions.

**Current Water Conservation Stage**

		Safe Operating Capacity (SOC) is 75% of total operating capacity.
